**PUBLICATIONS**

1. On some plane contact problems of elasticity theory with the account of cohesion forces and connected with them integral and differential equations. Izvestia. AN ARM SSR, Mechanics, v.3, N5-6, 1968, pp.3-20.
2. On spectral expansions of integral operators, anatoguos to Hilbert finite transformation. Mathem. Investigations, Kishinev, v.4, edit.1, 1969, pp.98-109.
3. Periodical contact problem for a half-plane with elastic stringers. Prikladnaya Matematica i Mekhanica (PMM), v.33, edit.5, 1969, pp.813-843. Coauthor N.Kh. Arutunyan.
4. Some contact problems for a semiplane with elastic stiffeners. Trends in elasticcity and thermo-elasticity, Groningen, 1971. pp.3-20.
5. Some contact problems for a half-space, reinforced by elastic stringers. PMM. N5, 1972, pp.770-787. Coauthor N.Kh. Arutunyan.
6. A plane contact problem for two rough elastic bodies, made from exponentially hardening materials. Izv. AN ARM SSR, Mechanics, v.30, N3, 1977, pp.15-32. Coauthor L.A. Shekyan.
7. On axisymmetric problem of contact interaction of the elastic sphere and elastic space with spherical cavity. Doklady: AN ARM SSR, v.68, N5, 1979, pp.273-279. Coauthor F.S. Torosyan.
8. On one method of obtaining spectral relationships for integral operators of mixed problems of solid media mechanics. PMM, v.46, N6, 1982, pp.1023-1031. Coauthors V.M. Alexandrov, E.V. Kovalenko.
9. On eigenfunctions of an integral operator, generated by logarithmic kernel on two intervals and their application to contact problems. Izv. AN ARM SSR, Mechanics, v.35, N6, 1982, pp.3-18.
10. On two spectral relationships for integral operators on semi-infinite interval and their application to mixed problems. Izv. AN SSSR, Mekhanica TverdogoTela (MTT), N1, 1983, pp.63-72.
11. On some spectral relationships, connected with Carleman integral equation and their applications to contact problems. PMM, v.47, edit.2, 1983, pp.219-227.
12. Contact problems for bodies with thin coverings and interlayers. M.: Nauka, 1983, monography, 448p. Coauthor V.M. Alexandrov.
13. On spectral relationships for integral operators, generated by kernel in the form of Weber-Sonin integral and their applications to contact problems. PMM, v.48, N1, 1984, pp.105-113.
14. On one spectral relationship in spheroidal wave functions and its application to contact problems. PMM, v.48, N5, 1984, pp.845-853.
15. On two contact problems of cylinders torsion with the help of cylindric shells taking into account their viscoelastic properties. Izv. AN ARM SSR, Mechanics, v.37, N3, 1984, pp.3-17. Coauthor Z.A. Davtyan.
16. On stress state of a deformed by power law plane, weakened by finite or semi-infinite crack. Izv. AN ARM SSR, Mechanics, v.38, N4, 1985, pp.16-29.
17. On one mixed boundary value problem for a half-space with circular line of the boundary conditions section. Doklady. AN ARM SSR, v.87, N2, 1988, pp.65-69. Coauthor S.Z. Petrosyan.
18. The inpression of a strip-like punch into a half-space which deforms exponentially. J. Appl. Maths Mechs, v.58, N1, 1944, pp.133-142.
19. On propagation of strip crack in infinite space. Izv. RAN. MTT, N6, 1993, pp.113-122.
20. On the function of psevdostresses in the problems of antiplane deformation of nonlinear theory of the established creep under power law. In the transactions of works "Contact and mixed boundary value problems of mechanics of a deformable solid body". Izd. NAN, Armenia, Yerevan, 1999, pp.108-116.
21. On one class of thermoelasticity boundary problems for an elastic plane with collinear system of cracks. Proceedings of the Third International Congress on Thermal Stresses, Cracow, Poland, 1999, pp.263-266. Coauthors D.I. Bardzokas, S.Kh. Gevorgyan.

22. Stress-strain state of cracked classic wedge under antiplane deformation with mixed boundary conditions on its faces.  Intern. J. of Fracture, 108, 2001, pp.291-315. Coauthors N. Melkumyan, B.H. Ben.
23. On one class of boundary problems of thermoelasticity for a classic strip with a collinear System of cracks. Fourth Intern. Congress on Thermal Stresses. Thermal Stresses 2001, June 8-11, Osaka, Japan, pp.269-272. Coauthors D.I. Bardzokas, S.V. Verlinsky.
24. Thermoelastic Stress state of a piece-wise homogenous half-plane with inner collinear system of cracks. Proceedings of the 5th International Congress on Thermal Stresses and Related Topics. TS 2003, Blacksburg, Va, TM-4-3-1-TM-4-3-4.
25. On a mixed Problem for an elastic space with a crack under antiplane and plane deformations. Modern Problems of deformable bodies Mechanics, Collection of papers dedicated to the memory of Professor P. S. Theocaris. Yerevan, "Gitutyun" NAS  RA, 2005, pp.98-113. Coauthors E.H. Manukyan, S.Kh. Gevorgyan, M.S. Mkrtchyan.
26. About a stress deformation condition of a picewise-uniform wedge with a system of collinear cracks at an antiplane deformation. Mathematical Problems in Engineering 2005:2 (2005), pp.245-268. Coauthors D.I. Bardzokas, S.Kh. Gevorgyan.

Total number of publications is 90.
